

GEOTECHNICAL ENGINEER/TECHNOLOGIST- R.W. Gillespie & Associates, Inc. is a 25-person solutions oriented consulting firm specializing in geotechnical engineering, construction inspection & materials testing, and environmental consulting services from offices in Portsmouth, New Hampshire and Saco, Maine. RWG&A provides services to local and regional clients throughout New England. RWG&A encourages and supports participation in professional organizations and a positive work environment.

RWG&A is seeking an engineer/technologist for our Saco office with subsurface exploration experience for geotechnical and environmental projects. The candidate should have an Associates or Bachelor of Science degree in Civil Engineering/Technology or Geology. The candidate should be familiar with installation and monitoring of geotechnical instrumentation.

The preferred candidate has demonstrated experience with soil and rock exploration and classification, installation and use of geotechnical field instrumentation, basic surveying, AutoCAD drafting, subcontractor coordination, and field and laboratory testing. The position will require multi-disciplinary assignments including geotechnical and environmental sampling, summarizing field data with occasional assignments requiring geotechnical observation during construction, and quality control/assurance programs. United States citizenship required.

Please send letter of interest and resume with detailed education and work history to:

Erik J. Wiberg, P.E.,
Chief Geotechnical Engineer
