Maine Engineers Week Banquet on Friday March 2nd

The Maine Engineering Promotion Council and its sponsors will host the Maine Engineers Week Banquet at the Wells Conference Center at the University of Maine in Orono at 6:00 PM (social beginning at 5:15 PM). Our featured speaker is Lawrence L. "Kaz" Kazmerski, an Executive Director at the National Renewable Energy Laboratory in Golden, Colorado, and a recipient of the World Photovoltaic Award for outstanding leadership and contributions to the worldwide advancement of photovoltaic science and technology.

As a former Associate Professor at the University of Maine, his research included thin-film photovoltaics, and he helped establish a graduate partnership with Fairchild Semiconductor. Kaz's current research interests include the DOE's Energy Frontiers Research Center dealing with "materials by design," and solar projects including the rebuilding of the electricity infrastructure in Iraq.

This is an opportunity for engineers and their spouses and friends to renew friendships and meet others in their profession. For more information or to register for the banquet, visit www.engineeringme.com or contact Be Schonewald, P.E. (be.schonewald@engineeringme.com).

Maine Engineers Week 2011 Exposition on Saturday March 3rd - The Expo will be held at the University of Maine Field House at the University of Maine from 9 AM to 2 PM. Over 1,000 children and adults are expected to experience first-hand the many contributions that Maine Engineers make to our communities and way of life. Thanks to our sponsors, the first 600 kids through the door receive a free T-shirt celebrating Maine Engineers Week.

Maine's top engineering firms, engineering schools, educators, government agencies, industry, and engineering societies will exhibit throughout the field house. Your participation will help encourage our youth to pursue careers in engineering and provide a diverse and vigorous workforce for the future.

This is an outstanding opportunity to gain positive exposure for your organization while inspiring the next generation of engineers. Sign up your organization as an exhibitor by downloading the registration form at www.engineeringme.com or contact MEPC Executive Director Victoria Blanchette (Victoria.blanchette@engineeringme.com). The registration deadline is February 27th...space is limited so sign up early!

Maine Society of Professional Engineers Continuing Education Seminar on Friday March 2nd - The banquet is preceded by the Maine Society of Professional Engineers full-day continuing education symposium at the Wells Conference Center. Visit www.mespe.org for more information.

The Maine Engineers Week activities could not happen without the support of our generous sponsors and volunteers.
